

SELPHY SQUARE QX10 MAKE MEMORIES THAT STICK

Printing your photos has never been more convenient with the SELPHY Square QX10. It is the perfect solution for fast quality prints on the go, straight from your smart phone!

Print Direct from Your Smart Phone Device

Simply download the free SELPHY Photo Layout 2.0 app, connect your phone to your printer via Wi-Fi and follow the instructions. Alternatively, scanning the QR code on the printer itself will easily connect your printer to your smartphone.

Modern and Compact Design

The compact size fits in the palm of your hand, so you can easily carry it anywhere, anytime, and enjoy printing images right away from your smartphone wirelessly. Simply charge up your Selphy Square QX10 before taking it with you, no batteries needed.

High Quality Square And Sticky Photo Paper

The Selphy Square QX10 produces beautifully bright and clear square photo prints, picking up smooth gradations, reproducing colours faithfully and expressing black tones well. The 1:1 square shaped photo paper also has an option to peel the back for a sticky surface.

What paper & ink packs
can I use with my printer?

Color Ink Label Set
XS-20L

Canon

Printing method	Dye-sublimation
Image quality	SELPHY image quality (Smooth gradation expression)
Print resolution	287 x 287 dpi
Paper size (mm) Printing size (mm)	72 x 85mm Printing surface (1:1) Maximum 68 x 68mm Default 65 x 65mm
Paper type	Label paper
Resistant to dirt and water droplets	Yes (Overcoating)
Printing speed	Approx. 43 sec.
Body size Body weight	Approx. 102.2 x 143.3 x 31.0 mm Approx. 445 g * Excluding ink cassette / label
Number of possible prints	Approx. 20
Charging time	Approx. 120 min.*
Connectivity with smartphones	Wi-Fi (For large capacity) Compatible with both iOS (iPhone and iPad) and Android OS smartphones and tablets.
Smart Devices	iOS: iPhones, iPads and iPods running iOS 11.4.1, 12.4.3, 13, and iPadOS 13. Android: Smartphones and tablets running Android 5.0-5.1, 6, 7.0-7.1, 8.0-8.1, 9, and 10. However, some messages may not be displayed on devices with small screens.
Editing app	SELPHY Photo Layout 2.0
Durability of prints	<p>A special film print overcoating is applied to beautifully finish prints, continuing to protect them from color bleeding and fading for a 100-year life when stored in an album. Album preservation prediction values are calculated based on indoor heat-resistance testing in digital color photo print image evaluation methods (JEITA CP-3901) established by JEITA (Japan Electronics and Information Technology Industries Association) and lifetime judgment criteria.</p> <p><Lifetime judgment criteria> Based on testing, assuming image is stored in a photo album in an environment with a temperature of 23°C at 50% humidity. Limit points are determined as follows: When the monochromatic/reflective OD value (0.5, 1.0) drops to 30% (set at each color unit), and when the discoloration concentration difference of Y, M, and C within BK (each component color) drops to 15%.</p>

* Charged with a charging cable.

* Up to approximately four hours when the battery is discharged, such as when charging for the first time or after being left for a long time.
