

SanDisk Cruzer Glide™ 3.0 USB Flash Drive

- Reliable storage of up to 128GB* for all your files
- Fast USB 3.0 performance
- Retractable design keeps the connector safe
- Password protection with included SanDiskSecureAccess™ software¹
- Backward-compatible with USB 2.0 ports
- Five-year warranty²

FULL PRODUCT DESCRIPTION

Spend less time waiting for files to transfer with fast, reliable and secure USB 3.0 storage for your photos, videos, music and other files.

The included SanDisk SecureAccess™ software¹ provides password-protection to keep private files secure while leaving the rest of the drive available for sharing while the retractable design safeguards the USB 3.0 connector when the drive is not in use.

Plus you have peace of mind, knowing that your SanDisk USB flash drive is backed by a five-year limited warranty².

FEATURES AND BENEFITS

- USB 3.0 performance
- Retractable design to protect USB 3.0 connector from dirt or damage when not in use
- Capacities up to 128 GB*
- Keep private files private with included SanDisk SecureAccess™ software¹
- Five year warranty²

GETTING MORE FROM YOUR USB DEVICE

Faster than a speeding ... USB 2.0 drive

USB 3.0 speeds give you faster transfer speeds³ so that you can spend less time waiting and more time on something interesting other than staring at the progress of your status bar.

Reliability that you can count on

With drive capacities from 8GB-128GB*, you can depend on the brand that consumers around the world trust to store your music, videos, photos and more.

Retractable design

No more hunting for that misplaced cap. The Cruzer Glide 3.0 USB flash drive features an easy-to-use retractable connector so it slides out of harm's way and doesn't need a cap.

Keep your private stuff private

Use the SanDisk SecureAccess™ software¹ to password-protect any files that you want to stay private. Then you can still share your other files, worry-free.

Plays nicely with USB 2.0 too

Don't worry, just because it's got USB 3.0 speeds, it's backward-compatible so you can still use it with USB 2.0 ports.
