# YOU choose your vertical hand position with Unimouse

Unimouse is an adjustable 'vertical' mouse designed with a unique articulated hinge which allows you to find your ideal hand position, from a gentle 35 degree slope, to a more upright 70 degrees.

Thumb Support Length

Hold thumb rest between thumb and index finger.
Move rest horizontally to set desired position.
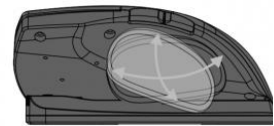

Body Tilt

70°   35

Hold base with one hand and top section with other hand
Tilt top section to set angle.

Thumb Support Extension

Hold thumb ext. between thumb and index finger,
push and pull to set thumb width.

Thumb Support Rotation

Place thumb on thumb rest. With slight pressure,
rotate thumb to set desired position.

Wireless model Features

- Feels stable and secure in any position thanks to friction technology.
- Positions your hand correctly to eliminate the need for gripping and pinching.
- Tri-axis thumb rest accommodates hand width with ease and allows you to relax your grip in any position, regardless of your hand size and shape.
- Precision state-of-the-art Pixart sensor offers seamless performance on almost any surface at a distance of up to eight metres, perfect for presentations.
- Choose from 10 cursor speeds.
- High performance lithium-ion polymer battery provides up to three months of power on a single charge. **Data Charge** cable allows you to charge while you work. Clever Smart Sleep battery system preserves power by sending mouse into automatic hibernation when not in use.
- Increase the speed of your workflow and personalise your Unimouse with six programmable buttons.
